

CLAIMS

1. A cover for a handle of a motorised toothbrush wherein
5 the cover is firmly and removeably attachable to the
handle by the toothbrush user, characterised in that the
toothbrush can be used with the cover in place.
2. A cover as claimed in claim 1, wherein the cover and
10 handle are furnished with co-operating locking means to
hold the cover in a fixed position on the handle.
3. A cover as claimed in claim 1, wherein the cover is
formed from at least two interlocking parts.
- 15 4. A cover as claimed in claim 1, wherein the cover is
formed of a hard plastic material.
5. A cover as claimed in claim 1, wherein the cover is
20 formed from an elastomeric material.
6. A cover as claimed in claim 1, wherein the cover is
furnished with a means to allow the operation of a
control switch on the handle when the cover is attached
25 to the handle.
7. A cover as claimed in claim 6, wherein the means to
allow the operation of a control switch is an opening
through the cover.

- 13 -

8. A cover as claimed claim 1, wherein the cover is provided with an external surface adapted to aid gripping.

5 9. A cover as claimed in claim 1, wherein the cover is adapted to allow a personalised message to be displayed on the cover.

10 10. A method for individualising an electric toothbrush comprising:

11. (a) providing an electric toothbrush comprising:

(i) a brush handle;

15 (ii) an electric motor activatable by a switch, the motor and switch housed within the handle;

(iii) a brush head attached to the handle and vibratable through communication with the motor; and

20 (iv) a shroud removably attachable as a cover over at least one portion of the brush handle, the brush head being vibratable with the shroud attached over the at least one portion of the brush handle;

25 (b) removing the shroud and replacing with an alternative shroud.
